1. Introduction and Features

Budget Tracker is a modern finance management application that supports multiple currencies (USD, TRY, RUB), works offline, and features cloud synchronization.

Key Features

- **Multi-Currency:** USD ($), TRY (₺), RUB (₽) support
- **PWA:** Can be added to iPhone/Android home screen
- **Cloud:** Synchronization with Google
- **Reporting:** PDF and Excel export
- **Balance Sheet:** Asset/debt tracking
- **Theme:** Light/Dark mode

> **About the Application**
>
> Budget Tracker is a professional web application that allows you to track your income and expenses, plan budgets, and analyze your financial situation. It supports USD, TRY, and RUB currencies.

Main Features

Feature	Description
Multi-currency budget management	Make transactions in USD, TRY, RUB currencies
Sign in with Google account	Secure cloud synchronization
Monthly and yearly reporting	Detailed financial reports
Data stored locally and in cloud	Dual backup security
Real-time exchange rate updates	Instant currency rate information
JSON format backup	Export your data
PDF and Excel export	Professional reports
Automatic synchronization	Your data is always up to date

2. Installation and Initial Setup

2.1 Adding to iPhone (PWA)

You can add the Budget Tracker app to your iPhone home screen and use it like a native app:

1. [1] Open the app in Safari and tap the Share button
2. [2] Select "Add to Home Screen" option
3. [3] Tap the Add button

2.2 Sign in with Google (Synchronization)

Sign in with your Google account to store your data in the cloud and sync across devices:

1. [1] Tap the "Sign in with Google" button under the header
2. [2] Select your Google account and authorize

> **Successful Sign In**
> Your data is automatically synchronized to the cloud. You can access your data on all devices by signing in with the same Google account.

2.3 Changing Language and Theme

Button	Location	Function
Theme	Top right	Toggle between Dark/Light mode
TR/EN	Top right	Switch between Turkish/English

3. Interface Overview

3.1 Header

The header bar at the top of the application contains the following elements:

```
Budget Tracker |
```

Top Right Corner Buttons

Icon	Name	Function
Theme	Theme	Dark/Light mode
TR	Language	Turkish/English
PDF	PDF	Download PDF report
Excel	Excel	Download Excel report
Data	Data	Backup operations
Rate	Rate	Exchange rates
Install	Install	PWA installation

> **Tip**
> You can see button descriptions by hovering over them. On mobile devices, long press to access the same information.

3.2 Year and Month Selection

Year Selector

You can change the year using the left and right arrow buttons. All budget and transaction data is filtered according to the selected year.

View Mode (Monthly/Yearly)

- **Monthly mode:** Detailed monthly tracking and daily limits
- **Yearly mode:** General yearly summary and trend analysis

Month Selector (in Monthly mode)

Select the month you want to view. All charts and summaries are updated according to the selected month.

3.3 Main Tabs

The application consists of three main tabs. You can switch between them using the tab bar in the middle of the screen:

Tab	Description
Budget	Budget planning and category management
Transactions	All income/expense records
Balance Sheet	Asset/debt tracking

4. Budget Tab

Budget planning and category management are done in this tab.

Income Items

Define all income categories here such as salary, rental income, investment returns, etc.

- Tap the `+ Add` button to add a new income category

Expense Items

Define all expense categories here such as rent, bills, groceries, transportation, etc.

- Tap the `+ Add` button to add a new expense category

Category Settings

You can make the following settings for each category:

Setting	Description
Budget Currency	Select USD, TRY, or RUB
Yearly/Monthly Budget	Planned amounts
Daily Tracking	For daily expenses like food/transportation
Icon	Icon representing the category

Editing and Deleting Budgets

Action	Button	Description
Edit	Pencil icon	Top right of category card
Delete	Trash icon	Deletes category and transactions

> **Important Warning**
> When a category is deleted, all linked transactions are also deleted!

5. Transactions Tab

This is the tab where all actual income and expense transactions are recorded.

Adding a Transaction

1. [1] Tap the `+` FAB (Floating Action Button) in the bottom right corner
2. [2] Select transaction type: Income or Expense
3. [3] Select category (from the grid)
4. [4] Select currency: USD, TRY, or RUB
5. [5] Enter amount, note, and date
6. [6] Tap the Save button

> **Tip**
> When you select TRY/RUB, the live exchange rate is automatically fetched and the USD equivalent is displayed.

Month Filter

In the Transactions tab, you can filter transactions by selecting "All" or a specific month from the month bar at the top.

Deleting a Transaction

Tap the trash icon on the right side of the transaction card and confirm.

6. Balance Sheet Tab

Track your assets, debts, and net worth.

Viewing Balance Sheet

1. [1] Go to the Balance Sheet tab
2. [2] Select "Current Status" or a specific month from the top filter

Assets and Debts

Type	Examples	Description
Assets	Cash, Receivables, Investments	Values you own
Debts	Loans, Credit Cards, Personal Debts	Amounts you need to pay

Adding Balance Sheet Items

1. [1] Tap the "+ Add Item" button
2. [2] Select date and type: Asset or Debt
3. [3] Select group
4. [4] Enter name, amount, and currency
5. [5] Tap the Save button

Automatic Debt Reduction

> **Smart Feature**
> When adding an expense transaction, if the category name matches a debt item in the balance sheet (e.g., "Home Loan"), the system automatically reduces that debt.

7. Summary Cards and Indicators

Income Plan Card

Indicator	Description
Planned Income	Total planned income amount for the selected period (in USD). TRY and RUB equivalents are shown in the bottom row.
Actual Income	Sum of recorded income transactions. The progress bar shows the percentage status relative to the planned amount.

Expense Plan Card

Indicator	Description
Planned Expense	Total planned expense amount for the selected period. The progress bar turns red in case of budget overrun.
Actual Expense	Sum of recorded expense transactions. Yellow warning above 80%, red warning above 100%.

Net Status Card

The net position found by subtracting actual expenses from actual income is displayed. Appears in green if positive, red if negative.

8. Currencies and Exchange Rate Management

Supported Currencies

Currency	Symbol	Description
USD	$	US Dollar
TRY	₺	Turkish Lira
RUB	₽	Russian Ruble

Base Currency

The base currency of the application is USD. All calculations and charts are made in USD, but you can enter your transactions in your preferred currency. The system automatically converts to USD at the current exchange rate.

Exchange Rate Update

Fetching Live Rates

1. [1] Tap the Rate button
2. [2] Tap the "Get Current Rates" button to fetch instant exchange rate information
3. [3] Rates fetched from the API are automatically applied to the relevant month

Manual Rate Entry

You can enter a separate exchange rate value for each month. This allows you to correctly calculate exchange rate differences for past periods.

Exchange Rate Usage Logic

Scenario	Rate Used
Adding transaction (internet available)	Live rate
Adding transaction (no internet)	Monthly recorded rate
Reporting	Rate at time of transaction

9. Basic Operations

9.1 Adding Income/Expense Categories

1. [1] Select the "Budget" tab from the main menu
2. [2] Tap the `+ Add` button. Use the button in the top section for income items, and the button in the bottom section for expense items
3. [3] Fill in category information: Category Name (e.g., "Salary", "Rent", "Groceries"), Currency (USD, TRY, or RUB), Budget (Planned amount yearly or monthly), Icon (Select an icon representing the category)
4. [4] Tap the Save button to create the category

9.2 Adding Income/Expense Transactions

1. [1] Tap the `+` button in the bottom right corner
2. [2] Select transaction type: Income or Expense
3. [3] Select category and details: Select category from the list, select currency (USD/TRY/RUB), enter amount, add note if desired, verify date
4. [4] The system automatically fetches the current exchange rate. Tap the "Save" button to complete the transaction

10. Reporting and Export

Creating PDF Report

1. [1] Click the PDF button in the header
2. [2] The report is automatically downloaded (based on Monthly/Yearly mode)

PDF Content

- General summary (Planned vs Actual)
- Detailed table by currency
- Spending trend and projection
- Detailed analysis by category
- Balance sheet summary

Creating Excel Report

1. [1] Click the Excel button in the header
2. [2] The Excel file is downloaded

Excel Sheets

Sheet	Content
Summary	General status summary
Income Items	Detailed income table
Expense Items	Detailed expense table
Transactions	All transaction records
Monthly Budgets	Month-by-month budget plan
Rates	Used exchange rates
Balance Sheet	Asset/debt status

11. Data Management and Backup

Exporting Data (Backup)

1. [1] Tap the Data button
2. [2] Tap the `Download JSON` button to save all your data to your computer in JSON format

> **File Name**
> All your data is downloaded in the format `budget-backup-YYYY-MM-DD.json`.

Importing Data (Restore)

1. [1] Tap the `Upload JSON` button
2. [2] Select the JSON file you previously downloaded

> **Important Warning**
> The data upload operation deletes all your current data and replaces it with the backup data. It is recommended to back up your current data before the operation.

12. Google Synchronization

The application uses Firebase infrastructure to store your data in the cloud. When you sign in with your Google account:

- Your data is automatically backed up to the cloud
- You can access the same data from different devices
- Data loss risk is minimized

Sign In

1. [1] Tap the "Sign in with Google" button from the auth bar under the header
2. [2] Select your Google account and authorize

> **Successful Synchronization**
> Your data is automatically synchronized to the cloud.

13. Application Settings

Changing Theme

Tap the Theme button (Dark mode or Light mode) to change the theme.

Changing Language

Tap the TR or EN button to change the language selection.

14. Frequently Asked Questions

Is my data secure?

Yes. Your data is stored both in your browser's local storage (localStorage) and in the Firebase cloud database (if you signed in with Google). It is recommended to take regular JSON backups.

Can I use it without internet?

Yes, the application works offline. When an internet connection is available, data is automatically synchronized.

Can I use it on multiple devices?

Yes. When you sign in with your Google account, all your data is stored in the cloud and accessible on all your devices.

Is the exchange rate updated automatically?

When adding a transaction, the system automatically fetches the current exchange rate. You can also manually update from the "Exchange Rates" modal.

Common Issues and Solutions

Issue	Solution
"Rates could not be fetched"	Check your internet connection, wait a few minutes and try again
Data not showing	Check the year selector, make sure you selected the correct year
Google sign in not working	Disable pop-up blockers
PDF not downloading	Check browser download settings

Tips

- Get current rates at the beginning of each month
- Take regular JSON backups
- Enable "Daily Tracking" for food/transportation categories for daily tracking
- Keep the category name and balance sheet item name the same for debt payments (for automatic reduction)
